WHY
CHOOSE US

With a wide range of features combined with high productivity and low costs we can give you the freedom to focus on your core business. Providing modular and scalable systems and proven customer support track record, we aim to meet all your business telephony requirements. Our team of highly experienced professionals have in depth business and technical knowledge to transform your business phone system.

Voicemail to Email
Receive your messages on any device and play, rewind or fast forward at any time.

Menu Options (IVR'S)
Present customers with options to direct their calls and give your business a professional appeal.

Call Recording
Record calls and have them sent to you as an MP3 file to listen to and use for training purposes.

Simultaneous Lines
Unlike traditional phone lines you don't need a phone number for each extension.
* Internal Calls are free - **HUGE COST SAVINGS**

Custom Hold Music and Recordings
Upload your professional recordings, hold music and on hold messages or we can help you find messages to fit in with your business needs.

ABOUT
OUR COMPANY

Edgetel is an Australian owned and operated business.

Established in 2009, Edgetel has continuously been offering VoIP services to businesses with critical support planning, implementation and operational service solutions. NBN ready, VoIP hosted PBX systems give your business the option to take phones anywhere there is internet. We can help address the strategic and crucial operational challenges your business telephone system faces by providing professional hosted PBX services that will give your business the edge.

Our first-class client support service team will always be happy to help you. We encourage you to ask questions and learn how to manage your new phone

SERVICES
WE PROVIDE

It's not a one size fits all, we design, implement and integrate each system to fit your business. We offer flexibility in the features you choose, no fixed contracts, no sign-up fees or account keeping fees. Your business could be saving hundreds of dollars a year with a hosted PBX system. Together we can create just the right phone system for your business to connect you to the world.

FLEXIBILITY
- Bring your own SIP phones or we can help you with hardware.
- Easy sign up - get activated in minutes
- Add or delete service as you need them
- Take your phone anywhere there is internet

CUSTOMISABLE
- Manage your phones from any device
- Software to manage your phone system 24/7
- Scale up your service when it suits you
- Only pay for what you use
- System changes happen instantly

HELP & SUPPORT
- Talk to a real person
- Emergency after hours support
- First class client support services
- Reliable service infrastructure with Fault tolerant data centres

UNLOCKED
- No lock in contracts
- Port your number when you are ready
- Numbers available from any Australian exchange
- 1300/1800 numbers available
- Pre-paid service

EDGETEL IS THE KEY TO
TO A PROFESSIONAL IMAGE FOR YOUR BUSINESS

PROFESSIONAL HARDWARE
TEAMED WITH GREAT SERVICE

The best partner to a great phone system is the best in handsets, introducing the Yealink series.

Yealink professional series hardware strikes the perfect balance between simplicity and sophistication, enabling high quality communications for business executives and professionals alike.

In addition to offering better overall performance with Yealink Optima HD technology, these devices enable crystal clear communications. Yealink provides all the features you could want from a business phone, and with one of the simplest to use interfaces, they are easy and reliable to use.
